

Ankit Raj

Senior Cloud Solution Architect — Azure AI, Multi-Cloud Infrastructure & Enterprise Transformation

Stockholm, Sweden | rajankit749@gmail.com | ankitraj.cloud | linkedin.com/in/raj-ankit | github.com/restlessankykyy

PROFESSIONAL SUMMARY

Senior Cloud Solution Architect (CSA) with 9+ years leading cloud and AI transformation for enterprise customers in customer-facing technical roles. Deep expertise in architecture design sessions, secure Azure solutions, and end-to-end technical delivery — backed by hands-on delivery in Azure AI Foundry and GitHub Actions. Proven track record: reduced latency by 70% and improved system resilience through end-to-end cloud migration of AML & KYC APIs from an on-premises monolith to serverless architecture. Brings strategic advisory and delivery oversight for a portfolio of enterprise-scale Azure workloads, including 99.9% uptime SLA for 200+ product teams across global operations.

CORE COMPETENCIES

Solutions Architecture	Azure AI Foundry, AWS Bedrock, Vertex AI, API Gateway, Azure Functions, EventGrid, SAP LeanIX, TOGAF, Zachman, Terraform
Cloud Services & Platforms	Microsoft Azure, Amazon Web Services, Google Cloud, Azure AI Foundry, Azure Functions, AKS, AWS Lambda, AWS Fargate, Google Kubernetes Engine, Cloud Run
AI & Machine Learning	Azure AI Foundry, AWS Bedrock, Vertex AI, OpenAI, Claude, Gemini, DALL-E, MCP, Multi-Model Orchestration
Multi-Cloud & Infrastructure	Microsoft Azure, Amazon Web Services, Google Cloud, AKS, Google Kubernetes Engine, OpenShift, Docker, Kubernetes, ECS, Fargate
Security & Networking	RBAC, Azure Policy, Zero Trust, OAuth 2.0, Security Baselines, Compliance Controls, Rate Limiting, REST APIs, GraphQL, Networking
Data & Analytics	DynamoDB, ELK, Grafana, Prometheus, Big Data Analytics, Cost Analytics, Governance Dashboards, A/B Evaluation
DevOps & CI/CD	GitHub Actions, Azure DevOps, CodePipeline, Terraform, Docker, Kubernetes, OpenShift, ECS, Fargate, CI/CD
Languages & Frameworks	Python, TypeScript, React, GraphQL, REST APIs, TOGAF, Zachman, SAP LeanIX, VS Code API
Leadership & Advisory	CAF, WAF, TOGAF, Zachman, SAP LeanIX, FinOps, Architecture Blueprints, Workshops, Best-Practice Documentation

PROFESSIONAL EXPERIENCE

Lead Cloud Architect — AI & Multi-Cloud

2024 — Present

H&M Group, Stockholm

- Serve as trusted technical advisor to executive stakeholders, translating business requirements into scalable cloud architectures across AWS, Azure, and Google Cloud while supporting 200+ product teams globally and advancing cloud and AI transformation.
- Architect and lead implementation of enterprise AI platforms on AWS Bedrock, Azure AI Foundry, and GCP Vertex AI — designing end-to-end solutions with multi-model orchestration, auto-scaling inference, and A/B model evaluation for production-scale AI readiness.
- Drive cloud migration and modernisation strategy for legacy workloads, enabling digital transformation across fashion retail and supply chain operations through secure, scalable, and resilient cloud architectures.
- Established cloud governance framework at enterprise scale — policies, security baselines, RBAC, and compliance controls for 1600+ subscriptions across multi-cloud estate, strengthening delivery oversight and security posture.
- Develop technical content including architecture blueprints, workshops, and best-practice documentation — creating repeatable IP for broader field teams and upskilling 8+ engineers in cloud architecture and system design.
- Lead enterprise architecture governance using SAP LeanIX, Zachman, and TOGAF frameworks — aligning technology decisions with long-term business strategy and enterprise customer delivery priorities.

Lead Cloud Architect — AML/KYC Modernisation

2025 — 2026

Ikano Bank, Stockholm

- Led end-to-end cloud migration of AML & KYC APIs from on-premises monolith to serverless architecture — reduced latency by 70% and improved system resilience across a complex technical project.
- Designed secure, scalable, and resilient architecture using Lambda, Fargate, API Gateway, DynamoDB, and Step Functions — handling 500K+ daily financial transactions with Terraform IaC.
- Built LLM-powered autonomous migration agent using Bedrock + Claude for automated API policy conversion, code analysis, and IaC scaffolding — cutting migration delivery time by 60% and accelerating technical blocker resolution.
- Delivered proof-of-concept demonstrations to executive stakeholders showcasing serverless cost savings and performance improvements, driving consensus for full cloud adoption and strategic technical engagement.
- Established CI/CD pipeline with GitHub Actions replacing legacy manual deployments — deployment frequency increased 10x and improved end-to-end technical delivery.

Lead Software Engineer — Platform Engineering

2023 — 2024

H&M Group, Stockholm

- Engineered multi-cloud platform backbone on Azure & Google Cloud — achieving 99.9% uptime SLA for 200+ product teams across global operations and strengthening resilient cloud infrastructure delivery.
- Designed and built Internal Developer Platform with self-service provisioning — EventGrid + Functions architecture reducing team onboarding from days to minutes and accelerating Azure adoption patterns.
- Evaluated, benchmarked, and deployed AI/ML tools (OpenAI, Claude, Gemini) — shipped developer productivity solutions improving team velocity by 40% and supporting production-scale AI readiness.
- Conducted deep-dive architecture reviews and architecture design sessions, creating world-class solutions and reusable patterns for cross-team adoption.

Senior Software Engineer — Distributed Systems

2020 — 2023

H&M Group, Stockholm

- Designed Zero Trust microservices architecture — 15+ services with sub-100ms p99 latency, demonstrating deep infrastructure and networking expertise across secure cloud workloads.
- Built high-throughput GraphQL & REST APIs handling 50K+ RPM across distributed systems on Azure + GKE with automated scaling and rate limiting, optimising performance and resilience.
- Led CI/CD standardisation using GitHub Actions across 200+ repositories — 95% pipeline success rate, establishing DevOps best practices and repeatable IP at enterprise scale.
- Resolved complex technical problems through root cause analysis across distributed systems, improving platform reliability and developer experience while removing technical blockers.

Volvo Cars, Gothenburg

- Served as technical consultant to Volvo Cars engineering teams — designing and implementing enterprise observability platform (ELK, Grafana, Prometheus) on AKS monitoring 100+ automotive microservices in a customer-facing delivery role.
- Authored runbooks, architecture documentation, and incident response procedures — achieving 99.5% SLA compliance across production environments and strengthening operational excellence.
- Partnered with cross-functional teams to identify and resolve infrastructure bottlenecks, translating automotive-specific requirements into optimised cloud solutions and driving measurable business impact.

Cloud DevOps Engineer → Cloud Developer

Cognizant Technology Solutions, India → Sweden

- Designed and implemented AWS cloud architectures for 5+ enterprise clients — CI/CD pipelines with CodePipeline, Docker, ECS/Fargate across diverse industry verticals, delivering complex technical projects end to end.
- Developed React-based Cloud Management Dashboard providing real-time infrastructure visibility and cost analytics to enterprise customers, supporting customer success through actionable cloud insights.
- Provided technical guidance and knowledge transfer to client teams, building cloud fluency across enterprise organisations through mentoring and knowledge sharing.

KEY SOLUTIONS & ARCHITECTURE PROJECTS

Enterprise AI Platform — Multi-Model Orchestration

Designed distributed AI orchestration platform serving 200+ teams. Multi-model inference pipelines with auto-scaling, A/B evaluation, and real-time serving. AWS Bedrock, Azure AI Foundry, Vertex AI, OpenAI, Python, TypeScript.

AML/KYC Serverless Migration — Cloud Architecture

Architected full cloud migration from on-prem to serverless. LLM-powered autonomous agent for automated code conversion. Lambda, Fargate, API Gateway, Bedrock, Terraform. 70% latency reduction, 60% faster delivery.

Enterprise FinOps Platform — Cloud Cost Optimisation

Multi-agentic AI system reducing multi-million SEK cloud spend. Automated anomaly detection, right-sizing recommendations, and governance dashboards across AWS, Azure, and GCP.

Rubin — AI Coding Assistant (Open Source)

Privacy-first local AI coding assistant with 14-tool agent mode, MCP server integration, streaming chat. Demonstrates AI/ML product thinking and developer tooling expertise. TypeScript, VS Code API.

CERTIFICATIONS

- OpenHack: AI-Powered Knowledge Mining · Containers · Security, Compliance & Identity · DevOps
- **Microsoft Certified Professional (MCP) — Exam 533: Azure Infrastructure**
- Microsoft Certified: Azure Fundamentals (AZ-900)
- **AWS Certified DevOps Engineer — Professional**
- **AWS Certified Developer — Associate**
- Google India Udacity Scholar

EDUCATION

Bachelor of Technology — Computer Science & Engineering

Galgotias University, Greater Noida, India

Specialisation in Cloud Computing & Virtualisation. Projects: IoT Heart Rate Monitor, Big Data Analytics.
