

Ankit Raj

Cloud Architect - Multi-Cloud, Integration & Advisory

Stockholm, Sweden | rajankit749@gmail.com | ankitraj.cloud | linkedin.com/in/raj-ankit | github.com/restlessankyyy

PROFESSIONAL SUMMARY

Cloud Architect and senior consultant with 10+ years designing and implementing scalable, secure, cost-effective cloud solutions across AWS, Azure, and Google Cloud. I translate business requirements into robust, enterprise-grade architectures and guide cross-functional teams from strategy through delivery. Deep hands-on expertise in multi-cloud and hybrid environments, integration and event-driven architecture (APIs, microservices, message queues), serverless, and containerisation with Docker and Kubernetes. Proven consulting and advisory track record across financial services and automotive - leading cloud adoption, migration, and digital transformation, presenting to executive and technical stakeholders, and delivering measurable impact (35% cost reduction, 70% latency reduction, 99.9% reliability). Strong in Infrastructure as Code (Terraform, Bicep, CloudFormation), CI/CD, and governance, with a collaborative, pragmatic style and a genuine focus on client outcomes. AWS and Azure certified.

CORE COMPETENCIES

Cloud Architecture	Enterprise-Grade Solution Design, Multi-Cloud & Hybrid, Scalability, Security & Performance, Migration Strategy, Cloud Adoption
AWS	EC2, S3, RDS, Lambda, VPC, IAM, CloudFormation, API Gateway, ECS/EKS, Fargate, Step Functions, DynamoDB, Organizations
Azure	Virtual Machines, App Services, SQL Database, Azure Functions, AKS, Azure DevOps, EventGrid, Entra ID, Sentinel, Policy, API Management
Google Cloud	Compute Engine, Cloud Storage, BigQuery, Cloud Functions, GKE, Cloud Run, Vertex AI, Pub/Sub, Dataflow
Integration & APIs	RESTful & GraphQL APIs, Microservices, API Management/Gateways, Event-Driven Architecture, Message Brokers (Kafka, SQS/SNS), ETL & Data Integration
Architecture Patterns	Microservices, Serverless, Containerisation (Docker, Kubernetes), Distributed Systems, Zero Trust, Well-Architected (CAF/WAF)
IaC & DevOps	Terraform, Bicep, CloudFormation, GitHub Actions, Azure DevOps, CI/CD, Infrastructure Automation, Monitoring & Logging (ELK, Grafana, Prometheus)
Consulting & Advisory	Strategic Advisory, Stakeholder Engagement, Executive Presentations, Architecture Documentation & Governance, FSI & Automotive Sectors
Languages	TypeScript, Python, JavaScript, Node.js, Go, SQL

PROFESSIONAL EXPERIENCE

Lead Cloud Architect - Multi-Cloud & Advisory 2024 - Present
H&M Group, Stockholm

- Trusted advisor to executive and technical stakeholders, translating business requirements into scalable, secure, cost-effective cloud architectures across AWS, Azure, and GCP for 200+ product teams
- Designed and architected enterprise-grade multi-cloud and hybrid solutions, leading integration efforts across hyperscalers and aligning custom development with cloud best practices and architectural standards
- Led a multi-million SEK cost optimisation programme - reduced cloud spend by 35% through right-sizing, reserved capacity, and automated governance, demonstrating performance and cost optimisation at scale
- Created architecture documentation, design patterns, and governance frameworks - RBAC, security baselines, and Azure Policy enforcing standards across 1,600+ subscriptions
- Built multi-agent AI workflows (MCP + RAG) on Microsoft Foundry and GCP Vertex AI for incident response and security governance, and led RFP evaluation for AWS vs Azure cloud strategy
- Presented technical solutions and recommendations to leadership and mentored 8+ engineers, providing strategic consulting on cloud adoption and digital transformation

Cloud Architect Consultant - FSI / AML & KYC Modernisation 2019 - 2020
Cognizant - Ikano Bank, Stockholm

- Provided strategic consulting to a financial services client on cloud migration - architected the move of AML & KYC APIs from an on-premises Axway gateway to AWS serverless, reducing latency by 70%
- Designed complex integrations using Lambda, API Gateway, Cognito, DynamoDB, and Step Functions - event-driven, microservices-based architecture handling 500K+ daily transactions
- Led the identity integration migrating from Curity to AWS Cognito (OAuth 2.0 / OIDC), and established governance with AWS Organizations and IAM least-privilege boundaries using Terraform IaC
- Delivered proof-of-concept demonstrations and recommendations to executive stakeholders, building consensus for full cloud adoption
- Implemented CloudWatch monitoring and GitHub Actions CI/CD, replacing manual deployments with secure, automated pipelines

Lead Software Engineer - Cloud Platform & Integration 2023 - 2024
H&M Group, Stockholm

- Engineered the cloud backbone on Azure & Google Cloud and led governance with Azure Policy and Sentinel, ensuring scalability, security, and reliability across enterprise workloads
- Designed and built an Internal Developer Platform with self-service provisioning - EventGrid + Azure Functions event-driven architecture reducing onboarding from days to minutes
- Led enterprise architecture using SAP LeanIX, Zachman, and TOGAF, aligning custom development and integration decisions with architectural standards and business strategy
- Evaluated and benchmarked OpenAI, Claude, and Gemini LLMs for developer experience, shipping solutions that improved team velocity by 40%

Senior Software Engineer - Distributed Systems & Integration 2020 - 2023
H&M Group, Stockholm

- Designed a Zero Trust microservices architecture - 15+ services with sub-100ms p99 latency, demonstrating distributed-systems and scalability expertise
- Built high-throughput GraphQL & REST APIs (50K+ RPM) and a multi-cloud API platform with Azure API Gateways on GKE, with automated scaling and rate limiting
- Led CI/CD standardisation with GitHub Actions across 200+ repositories - 95% pipeline success rate, establishing DevOps and integration best practices at enterprise scale
- Resolved complex cross-system technical issues through root-cause analysis, improving reliability and developer experience

Volvo Cars, Gothenburg

- Trusted technical advisor to engineering teams - designed and delivered an enterprise observability platform (ELK, Grafana, Prometheus) on AKS monitoring 100+ microservices
- Managed CI/CD pipelines for OpenShift & Kubernetes with Azure DevOps - reduced deployment cycle time from hours to 15 minutes
- Authored architecture documentation, runbooks, and incident response procedures - achieving 99.5% SLA compliance across production environments
- Partnered with cross-functional teams to translate automotive requirements into optimised cloud solutions

Cloud DevOps Engineer → Cloud Developer

Cognizant Technology Solutions

- Designed AWS cloud architectures for 5+ enterprise clients - CI/CD with CodePipeline, Docker, and ECS/Fargate across diverse industry verticals in client-facing consulting roles
- Automated resource tagging and policy governance across AWS & Azure using Config Rules, Azure Policy, and Lambda - establishing compliance guardrails at scale
- Built a React-based Cloud Management Dashboard providing real-time infrastructure visibility and cost analytics to enterprise customers
- Won 1st place at Enterprise AWS Game Day 2018 (200+ participants) and led knowledge transfer to client teams

KEY SOLUTIONS & ARCHITECTURE PROJECTS

AML/KYC Serverless Migration - FSI Cloud Architecture (Ikano Bank)

Architected full cloud migration from on-prem Axway to AWS serverless. Event-driven, microservices design with Lambda, API Gateway, Cognito, DynamoDB, Step Functions. Curity to Cognito identity migration, Terraform IaC. 70% latency reduction.

Enterprise FinOps & Cloud Governance Platform (H&M Group)

Multi-agentic AI system reducing multi-million SEK cloud spend across AWS, Azure, and GCP. Automated anomaly detection, right-sizing, and governance dashboards aligned to CAF/WAF, with measurable cost optimisation.

Internal Developer Platform - Event-Driven Integration (H&M Group)

Self-service provisioning platform on Azure - EventGrid + Functions notification workflows in TypeScript, standardising golden-path infrastructure and reducing onboarding from days to minutes.

OpenClaw Tesla - API Integration AI Agent (Open Source)

AI agent plugin integrating the Tesla Fleet API with 21 voice-controlled actions, secured with OAuth 2.0. Demonstrates RESTful integration, token management, and event-driven orchestration. TypeScript.

CERTIFICATIONS

- AWS Certified DevOps Engineer - Professional
- AWS Certified Developer - Associate
- Microsoft Certified Professional (MCP) - Exam 533: Azure Infrastructure
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft OpenHack: AI-Powered Knowledge Mining · Containers · Security, Compliance & Identity · DevOps
- Google India Udacity Scholar

EDUCATION

Bachelor of Technology - Computer Science & Engineering

Galgotias University, Greater Noida, India

Specialisation in Cloud Computing & Virtualisation. Projects: IoT Heart Rate Monitor, Big Data Analytics.
